

User Report - AI Enhanced

Trenton Cook's user analytics report (2018-09-01 to 2025-10-13) shows a consistent and focused work pattern with the following key insights:

- **Total hours worked:** 1917.6 hours over 229 working days, averaging 8.4 hours/day.

- **Se**

Additional observations:

- The

This data indicates a steady, focused work rhythm with a specialization in a primary client and moderate engagement with others. Productivity measured by hours and clients served is below DDMAC team averages, suggesting potential capacity for increased workload or diversification.

If you want, I can help further analyze trends over time, identify productivity patterns, or provide recommendations for improving efficiency or client engagement.
