

User Report - AI Enhanced

Trenton Cook worked a total of **938.2 hours** over **112 working days** between January 1 and October 13, 2025, averaging **8.4 hours per day** with 296 total sessions averaging 3.2 hours each. He served 4 clients, with the majority of time (771.7 hours) spent on client SEATON, followed by Hopewell AOIP (115.8 hours), plus time allocated to Lunch Break and Health & Safety Training[User Report].

Key Insights:

- **Workload & Productivity**:

Trenton's average daily hours (8.4) and session length (3.2 hours) align with DDMAC team averages, placing him in the lower percentiles for total hours (18.2%) and average hours/day (33.3%), indicating moderate utilization relative to peers. His rank for clients served (37/66) and session length (32/66) is mid-range, while longest session rank (25/66) is better, showing capacity for focused extended work periods[User Report].

- **Client Time Distribution**:

- SEATON dominates Trenton's workload (82% of total hours), with consistent engagement from early Jan to late Jul 2025.
- Hopewell AOIP is the second major client, with concentrated activity from late Mar to mid-Jun.
- Lunch Break sessions are frequent but short (average 0.5 hr), likely non-billable breaks.
- Minimal time allocated to Health & Safety Training (5.2 hrs on one date) indicates occasional compliance or development activities[User Report].

- **Daily Work Patterns**:

- Most working days involve 2 clients and 3 sessions, typically with a longest session around 4.5 hours.
- Longer days (9+ hours) are frequent, with occasional peaks above 10 hours, suggesting strong work engagement on certain days.
- Single-client days and shorter total hours are less common but present, possibly reflecting varied workload intensity or administrative days[User Report].

- **Comparative Performance**:

Despite being below average in total hours worked, Trenton maintains average session length and serves a typical number of clients, suggesting balanced workload distribution and session management. His percentile ranks indicate room for increased utilization or client diversification to improve competitive standing within the team[User Report].

Recommendations:

- Consider strategies to increase total billable hours or client diversification to improve utilization and rank within the team.
- Maintain or optimize longer focused sessions (4+ hours), as these correlate with productive work blocks.
- Monitor Lunch Break duration and frequency to ensure adequate rest without impacting overall productivity.
- Track client engagement trends to balance workload and avoid over-reliance on a single client.

This analysis provides a comprehensive view of Trenton Cook's work patterns, productivity, and client engagement for the specified period, aligned with team benchmarks for actionable insights.
